**Beloit Residents Reminded to Keep Grass Clippings out of Streets**

**June 26, 2018** - Beloit residents are reminded to ensure their grass clippings are not placed in the street after mowing their yards.

Grass clippings can clog storm drains and put harmful nutrients in our waterways. Residents should direct clippings away from the streets while mowing and then blow back any clippings that land in the streets. City ordinances prohibit the placement of any debris, such as grass clippings, in the street, gutters, sidewalk, or other public property.
