Broad Street Bridge Repair

Work is scheduled to begin on the Broad Street Bridge on Monday, November 9 through November 20. This will be a partial depth concrete repair across the deck area to address the spalling loose concrete. Passersby may have noticed the marking paint on the bridge since July; the total work will cover approximately 715 sq. ft.

The “bridge” is actually 2 adjacent, independent structures, of which the northeast (northbound) one will be closed during construction. The southwest bridge (southbound) will be divided, leaving one lane in each direction. Pedestrian traffic will be directed to the west sidewalk. Traffic control will begin today (11/6) and chipping concrete will start Monday (11/9). The project is expected to finish within 2 weeks (11/20).
