MISSION & VALUES

MISSION: The City of Beloit's mission is to provide outstanding public service.

CORE ORGANIZATIONAL VALUES

- B - Be safe:** Safety comes first. We each play a role in the health, safety and welfare of the public at large and must act in ways that enhance our own personal safety, the safety of our co-workers and those we serve.
- E - Ethical behavior:** We are dedicated to high ethical and moral standards and uncompromising honesty in our dealings with the public and each other. We do what we say we are going to do.
- L - Leadership:** Leadership is developed and shared throughout the organization with an emphasis on continuous improvement.
- O - Outstanding public service:** We are committed to providing outstanding services to our diverse public and internal customers.
- I - Inclusion of diverse people and ideas:** We respect the unique contributions of our fellow employees, citizens, groups, and organizations throughout the community by seeking out their opinions, talents, and needs.
- T - Teamwork to creatively solve problems:** We are a team of diverse employees, working internally across departments and divisions, as well as externally with our many stakeholders to creatively solve problems.

STRATEGIC FRAMEWORK

We are committed to incorporating frameworks of Equity, Diversity, Inclusion & Belonging and Sustainability in all areas of the Strategic Plan and in the daily operations of the City of Beloit.

EQUITY, DIVERSITY, INCLUSION AND BELONGING: *What Is Equity, Diversity, Inclusion and Belonging?*

Inclusion of diverse people and ideas is a core organizational value for the City of Beloit. It is also a lens through which we view everything we do both inside the organization (internal) and for the community (external). This lens requires the understanding and integration of the concepts of diversity, equity and inclusion to achieve the ultimate goal of belonging.

These words are commonly used interchangeably. It is essential to differentiate these terms and to create shared meaning in order to achieve mutual understanding.

One of the ways to achieve this is to acknowledge unconscious bias. All humans have biases based on their experiences and viewpoints. Rather than pretending to be all-inclusive all the time, we must tap into our vulnerability and openly acknowledge biases-no more claiming color, age or gender blindness. Recognizing unintentional bias helps create learning that moves organizations and communities toward inclusion and environments where all individuals feel they can be authentic and belong.

SUSTAINABILITY: *What is sustainability?*

The City of Beloit supports a simple model of sustainability that consists of three "pillars": environmental sustainability, economic sustainability, and social sustainability. These three pillars are interrelated and true sustained community wellbeing is not achievable without addressing all three.

The most widely accepted definition of sustainable development emerged from the United Nation's Brundtland Commission, which in 1987 defined it as "development that meets the needs of the present without compromising the ability of future generations to meet their own needs." This framework establishes the necessity of responsibly managing our environment and resources.

The three interconnected elements of sustainability. *Image credit: NicePNG*

Environmental Sustainability:

Environmental sustainability requires that we live within the means of our natural resources and work to preserve and improve the natural environment. We must use land, water, and energy in a responsible manner that ensures the health of our natural environment and considers the scarcity of the resources we are consuming. This is achieved by adopting policies and programs that preserve, protect, and enhance our natural environment to protect future generations. The City of Beloit wants to foster a resilient community that maintains and protects existing resources.

Economic Sustainability:

Economic sustainability means that we make decisions in an economically and fiscally responsible way. We must consider the health of our local economy and strive to establish an environment that allows businesses to grow and thrive in the City of Beloit. The success of the local economy and businesses allows the City of Beloit to maintain financial solvency and continue to provide residents with outstanding public services that ensure a high quality of life. Economic sustainability also means equitable access to employment opportunities. The City of Beloit wants to strengthen the economic outlook and encourage private adoption of sustainable business practices.

Social Sustainability:

Social sustainability means that we make decisions that are in the best interest of the health and well-being of our residents. The City of Beloit must be committed to building a healthy community. The City of Beloit should provide its residents with information and resources on healthy living and invest in programs that promote healthy lifestyles or prevent negative health consequences. A massive element of social sustainability is also the strength of the community, which is measured by the sum of the social connections and shared values. The City of Beloit wants to improve the health and wellness of Beloit residents and create a shared community value of sustainability and environmental protection.
