Date: September 25, 2017
Presenter(s): Jason Dupuis
Departments(s): Public Works-Engineering

Topic / Purpose for Presentation:

Ordinance to establish permit parking and emergency vehicle parking areas in the City Hall Parking Lot.

Background Information:

The City Hall Parking Lot was sealed earlier this year. While coming up with a parking plan during the construction phases, it was discovered that a new ordinance related to permit parking and emergency vehicle parking would be required for this lot.

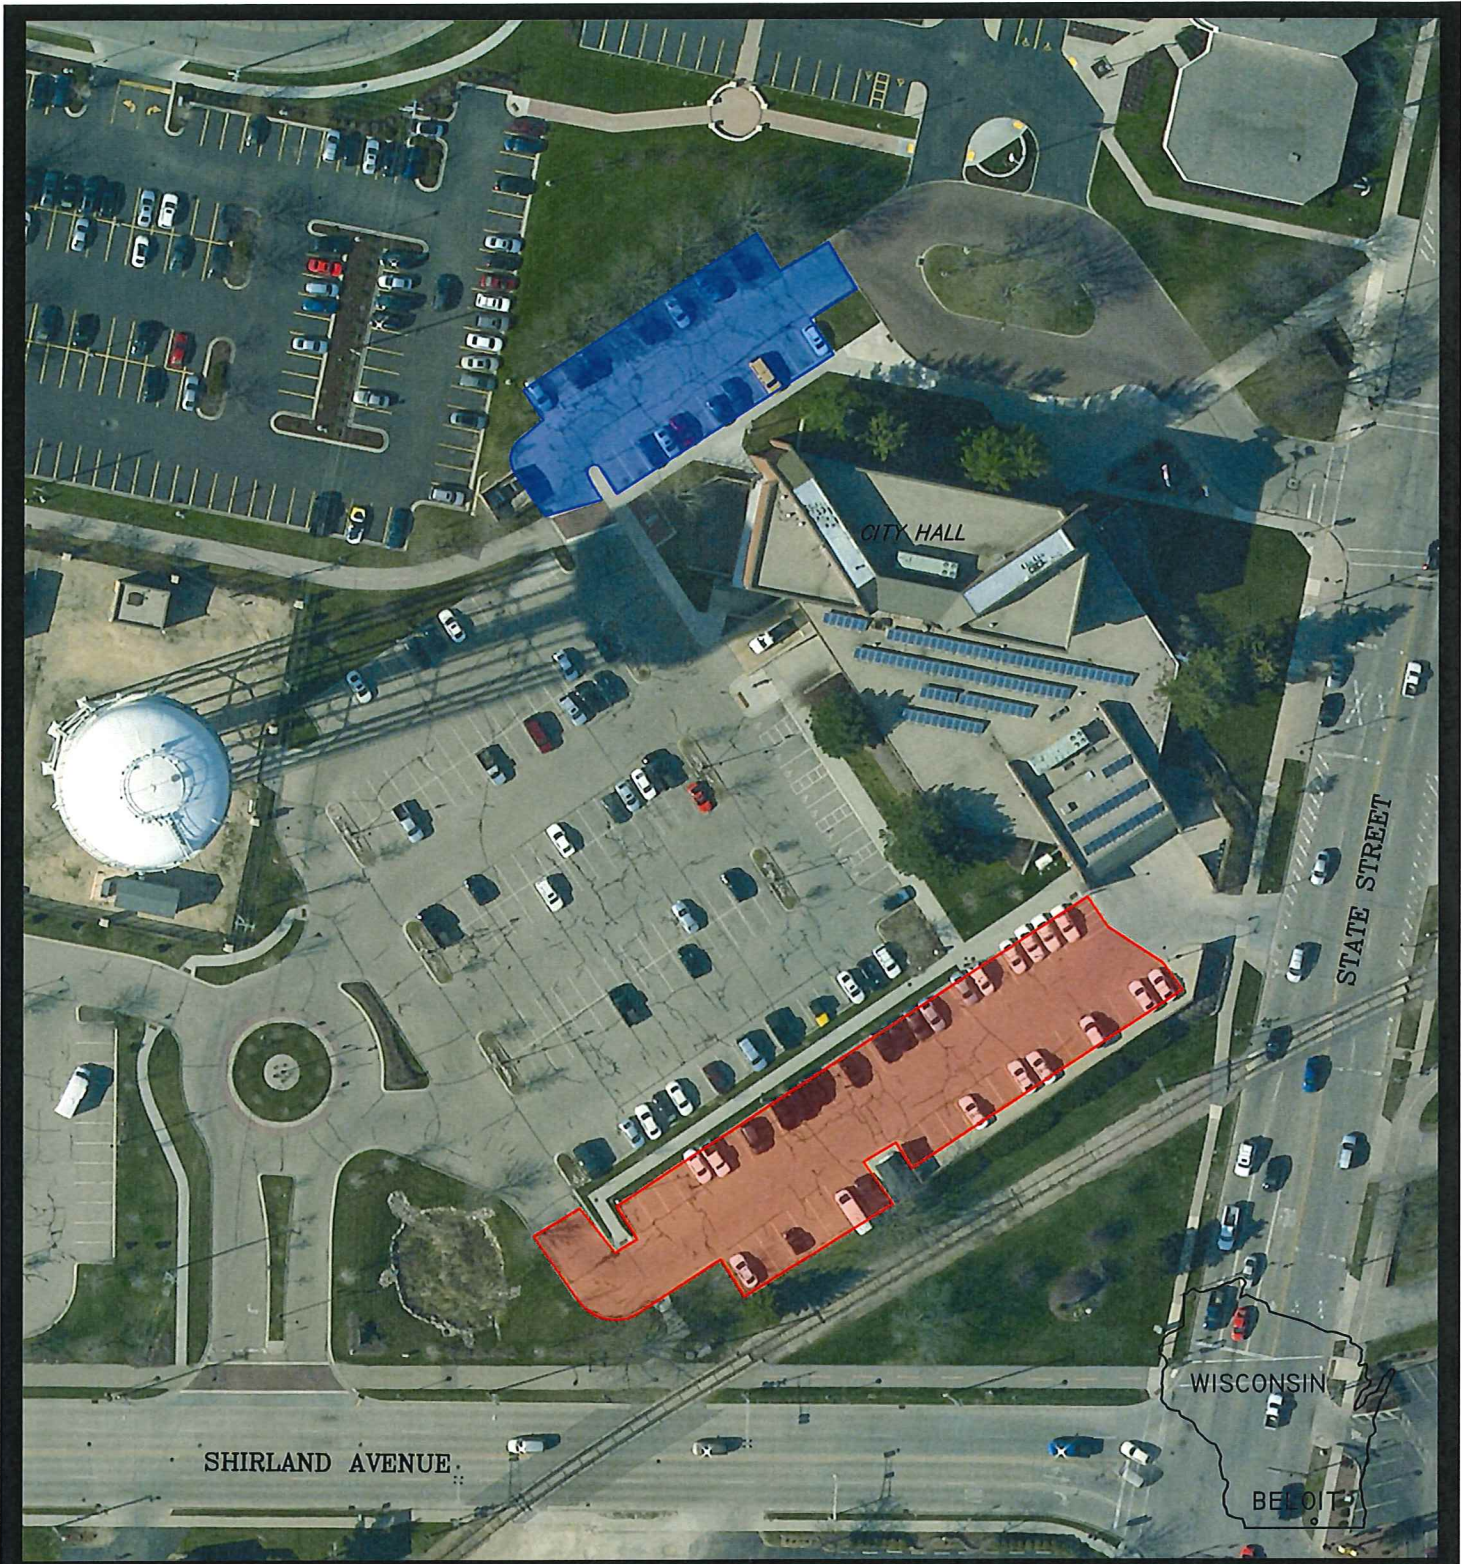

Key Issues (maximum of 5):

1. The City Hall parking lot was reconstructed and reconfigured in 2009.
 2. The old ordinance designated the areas for employee parking, timed visitor parking and emergency vehicle parking at City Hall under the Miscellaneous Limitations on Parking section.
 3. The new area for employee parking will be the area shown in blue and consists of 27 stalls.
 4. The new area for emergency vehicles will be the area shown in red and consists of 50 stalls.
 5. Both the employee parking area and emergency parking area are already designated with signage.
-

Action Required / Recommendation / Evaluation:

Staff recommendation is to establish new permit parking and emergency vehicle parking areas in the City Hall Parking Lot.

REPORTS AND PRESENTATIONS TO TRAFFIC REVIEW COMMITTEE

Action Required * _____ Information Only X Options Attached

Date: September 25, 2017
Presenter(s): Jason Dupuis
Departments(s): Public Works-Engineering

Topic / Purpose for Presentation:

Discussion regarding the petition to install traffic signals at the intersection of Cranston and Cobblestone and reduce the speed limit from 35 MPH to 30 MPH.

Background Information:

The City of Beloit received a petition from Allen (Butch) Dix and signed by multiple residents requesting a signal at the intersection of Cranston Road and Cobblestone Court. In addition the petition requested that the posted speed limit is lowered from 35 MPH to 30 MPH between Shopiere Road and the Walmart store (Sutler Avenue).

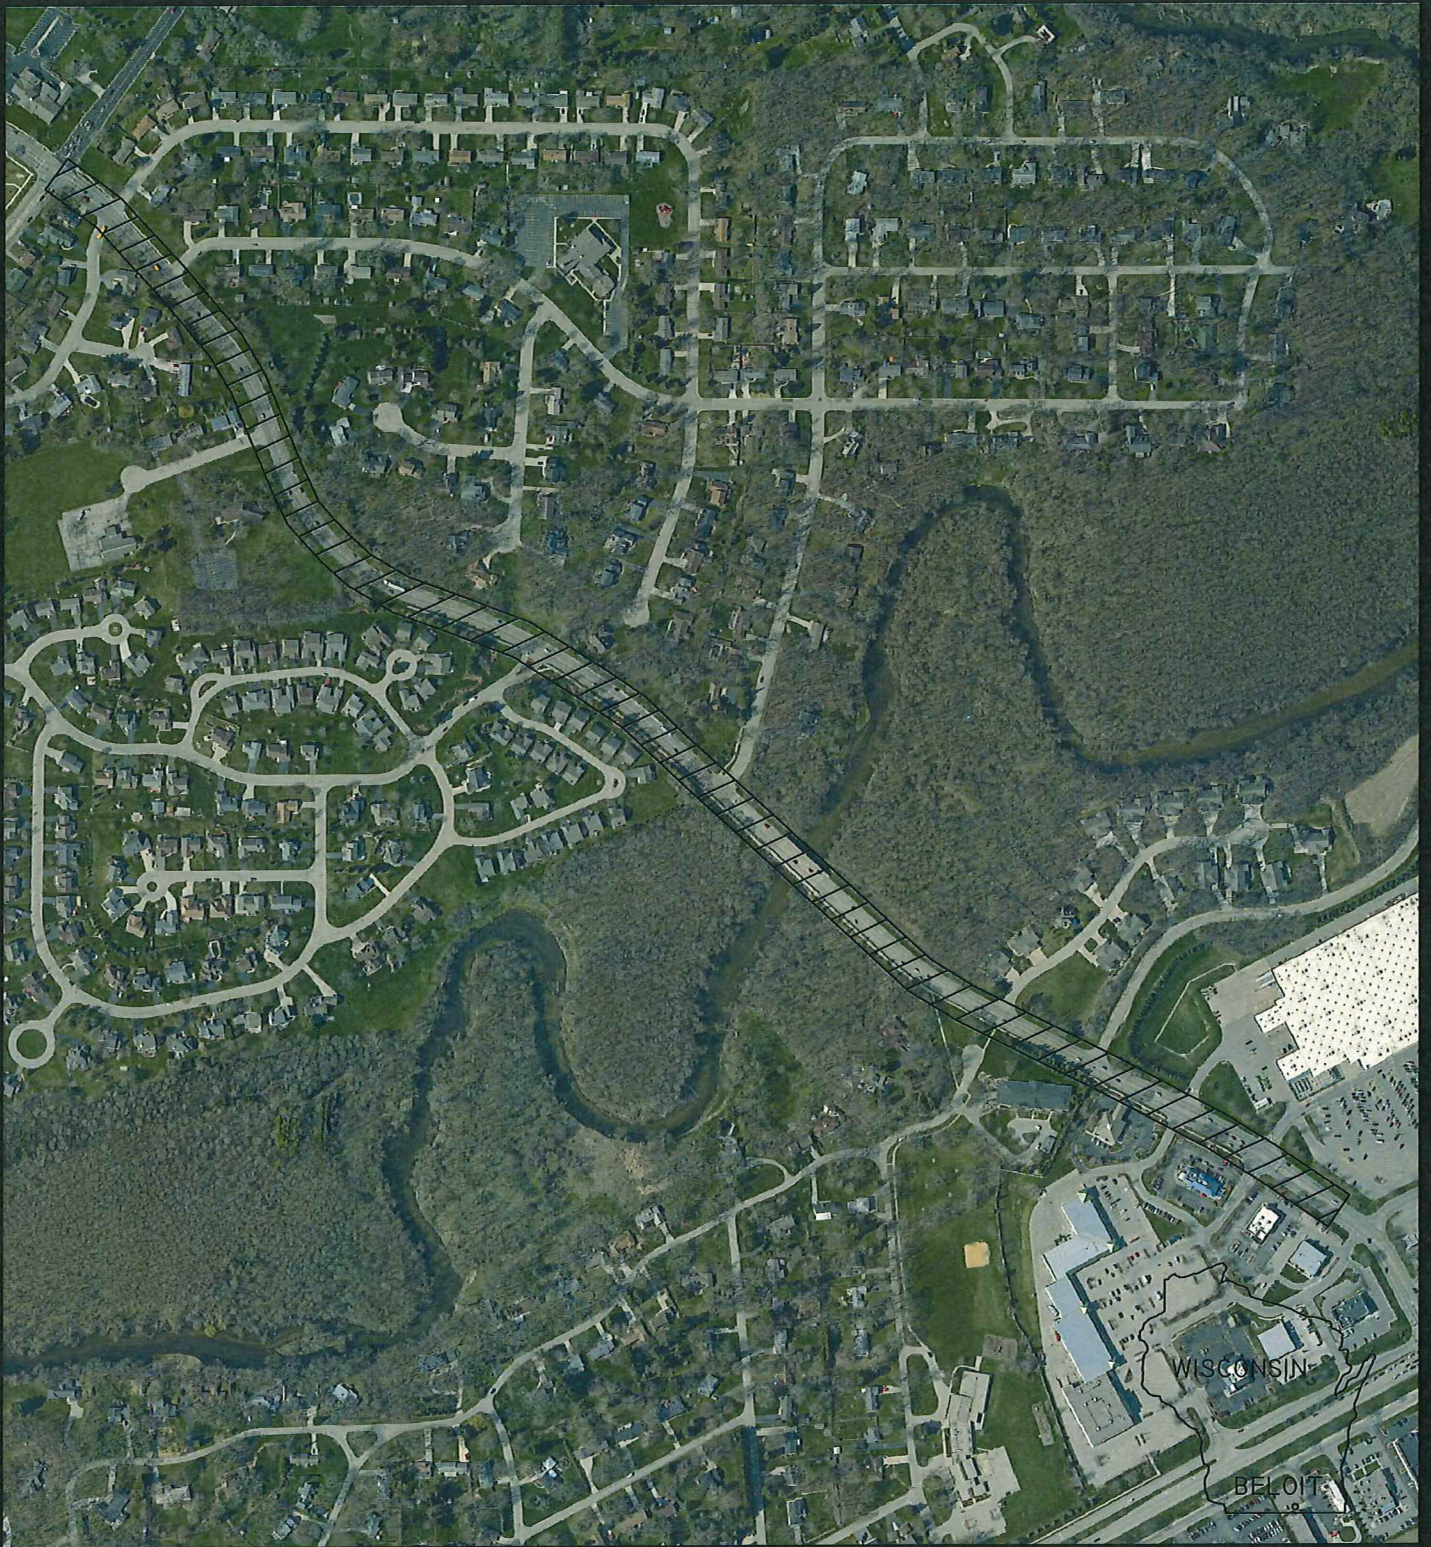

Key Issues (maximum of 5):

1. The Cranston Road corridor was listed during the May meeting as an upcoming traffic study.
 2. Currently, the corridor study for Cranston Road is scheduled to take place in 2018 utilizing metropolitan planning organization (MPO) funding.
 3. The corridor study plans to look at the traffic volumes, pedestrian movements, turning movements, signalized intersections, accident history, geometric layout, etc. throughout the corridor.
 4. A new multi-use path was constructed along the south/west side of the corridor in 2017.
 5. Once completed, the corridor study will provide recommendations for improvements along the corridor.
-

Action Required / Recommendation / Evaluation:

Staff recommendation is to wait for the completion of the 2018 corridor study before recommending any changes along the corridor.
